

PRIME EVAPLOC

MANUFACTURED FOR CONCRETTERS BY CONCRETTERS AFTER EXTENSIVE PRODUCT TESTING!!

DESCRIPTION

PRIME EVAPLOC is a water-soluble liquid when sprayed on curing concrete creates a plastic film that retards water evaporation in setting concrete. This greatly reduces the chances of plastic shrinking (known as hairlines) while making the concrete more workable for an extended period.

BENEFITS

- Prime Evaploc reduces the chances of plastic shrinkage by up to 80% if the ground surface has been thoroughly watered prior to concrete placement.
- Using Prime Evaploc will allow the concrete to be workable for a longer period by delaying the surface to crust over in windy and hot conditions.
- Once applied the concrete surface will have a creamy feel under the trowel making finishing easier without altering the concrete strength or durability.
- Prime Evaploc retards concrete water evaporation by up to 80% in windy conditions and up to 60% in sunlight.
- The distinctive fluro green colour ensures easy and even product application. The bright colour that makes application so easy leaves no staining or residue once cured.
- Because you dilute the Prime Evaploc it costs less than 10 cents a square meter per coat.

DIRECTIONS

Mix 1 litre of PRIME EVAPLOC concentrate with 9 litres of water. 10 litres of diluted PRIME EVAPLOC will cover approximately 50 square meters of concrete with one coat. For easy application use a PRIME BACKPACK SPRAY UNIT or any garden sprayer.

Apply the first coat of diluted PRIME EVAPLOC once you have screeded and bull floated the concrete. A second coat is then applied after finishing the concrete. This coat is to be applied once the surface has cured enough that the product will not pit the concrete surface.

SAFETY INSTRUCTIONS

Keep out of reach of children. AVOID CONTACT WITH SKIN, EYES

PRIME EVAPLOC is slightly alkaline. Avoid contact with skin and eyes. Wear suitable protective clothing (goggles, impervious footwear and gloves) when handling. PRIME EVAPLOC should not be stored in metal containers for long periods. Stored out of the direct sunlight and under 40 degrees Celsius in sealed original drum, shelf life is at least 18 months.

CLEANING Prime Evaploc is a water-soluble product that is preferably cleaned in hot water however cold water can be used.

SPILLS AND DISPOSAL

It is important to keep Prime Evaploc out of sewer and storm water drains. DO NOT pour any leftover product down the drain. If spills occur, contain and absorb the spill to prevent it entering stormwater drains. Retain any leftover product in the original labelled sealed container for future use.

FIRST AID Wash skin thoroughly and remove contaminated clothing. Eye – Hold open and flood with water for 15 minutes. Ingestion - DO NOT Induce vomiting. Give a glass of water after rinsing mouth and seek medical advice. If vomiting occurs, give further water and seek medical advice.
